Benefits

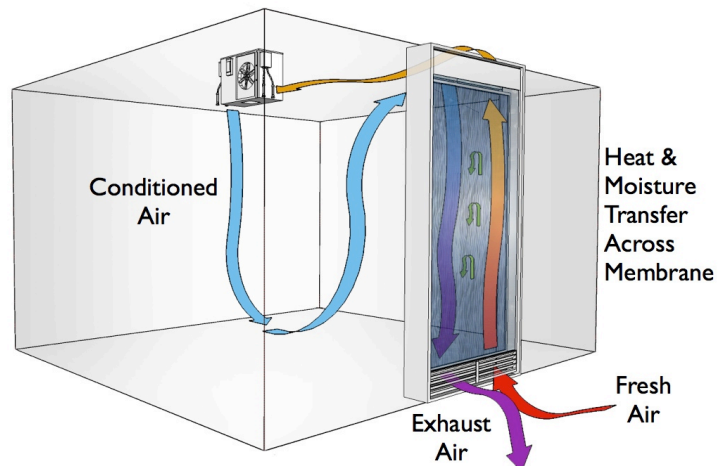

- + By removing the heat and humidity before it enters the HVAC system, the AirFlow Panel saves 25-50% on air conditioning energy.
- + Adding AirFlow Panels reduces the required size and cost of the HVAC system by 7-10%.
- + AirFlow Panels enable owners to reclaim leasable floor space from centralized ventilation pathways.
- + The product improves indoor air quality and occupant health by eliminating most of the mold-forming moisture.
- + AirFlow panels help meet green building energy codes and certification standards.

Panel Sizes

33" x 54" (min) – 96" x 168" (max)

+ 2,600 ft² Floor Area Served

+ 89% Effectiveness / Efficiency
